For Immediate Release:

SAGEQUEST AND MILSOFT ANNOUNCE MULTISPEAK® VERSION 4 CERTIFICATION

Interoperability of outage management system and GPS vehicle location software will enable utilities to expedite service restoration

ARLINGTON, VA, January 14, 2010 — SageQuest announces that its Mobile Control GPS vehicle management solution has achieved MultiSpeak® certification for interoperability with Milsoft Utility Solutions' DisSPatch outage management system (OMS) on MultiSpeak® Version 4.

By integrating Mobile Control with DisSPatch OMS from Milsoft, both companies have taken critical information and combined it to deepen analysis they deliver independently. Utilities can now efficiently prioritize crews to outage locations expediting restoration of service to their customers.

SageQuest's Mobile Control provides visibility of workers and vehicles in the field with real-time updates of vehicle GPS location data to Milsoft's DisSPatch Client Map. Together they provide enhanced awareness and increased operational efficiency, while supporting the safety of their mobile technicians.

About SageQuest

SageQuest LLC provides proven GPS vehicle management solutions that improve the efficiency and productivity of mobile workers for utility, cable and broadband companies throughout North America. SageQuest's Mobile Control compliments workforce management tools to provide real-time insight into technician and vehicle activity, providing actionable decision-making information for dispatchers, supervisors and executives. Mobile Control is a software-as-a-service (SaaS) solution, which helps customers minimize their upfront capital investment.
